

HAO

When Hao was in early intervention, we had a chance to participate in the Global Foundation For Children With Hearing Loss program. I am

happy because I have met many people who are experienced in working with children with hearing loss.

At my child's first year, he didn't have language, but I did apply what I learned from the program. After several months, Hao started to babble and seemed to like Mom's new method of teaching.

Hao received a pair of high-powered hearing aids from the Global Foundation For Children With Hearing Loss. After two months, he could speak words clearly that he hadn't spoken clear before. I cannot express my happiness.

Later, I worked with him on vocabulary strategies that I learned from the Global Foundation. Although it was difficult at first, he understood that he needed to talk if he wanted something from Mom. I am so lucky that I have learnt from the Global Foundation professionals.

Now, I can teach him easily and don't have much pressure. I can ask him to go to the market and buy things I need, and he can bring money to choose his favorite breakfast. I would like to show my sincere gratitude to all the professionals of the Global Foundation For Children With Hearing Loss.
