

VY

Vy was identified with hearing loss very late. My family bought a pair of hearing aids but they were not strong enough for her. At the beginning, my family did not know how to teach Vy either. She didn't usually use the hearing aids. So, Vy could only say approximately 20-30 words after a year of wearing the hearing aids.

We brought Vy to Thuan An Center to work with the teachers trained by the Global Foundation For Children With Hearing Loss. Soon after, we received brand new high-powered hearing aids for Vy from the Global Foundation. I also learned a lot from the Global Foundation experts during the program.

With the help of the Global Foundation For Children With Hearing Loss and the teachers of Thuan An Center, my child can now say long sentences. She is able to carry on a conversation with friends and family members.

My family sincerely thanks the Global Foundation For Children With Hearing Loss and Thuan An Center for helping my daughter so that she can become as she is today. And my family promises to keep using the knowledge we have learned to help her continue to progress.
